Product Specification Sheet

Detectable Aburnet Hairnet | PED00HCHB

Product Description

The HiCare Detectable 3mm Hairnet represents the latest advancements in detectable hairnet and hair contamination prevention technology. The unique patent pending design of the HiCare Hairnet is constantly working to hold the head of hair and hold

hairs flat to contain hairstyles of all lengths.

The HiCare Detectable Hairnet features an ultra close mesh, offering x2 times better hair containment than a traditional mesh hairnet.

Detectable Aburnet Beard Snood Advantages

- ✓ Detectable by in-line metal detection systems
- ✓ Highly visible colour for easy visual identifications
- √ Significantly reduces foreign body hair contamination
- √ Two integral metal detectable closures reduces the risk of the product becoming a foreign body contaminant.
- ✓ Manufactured from Polypropylene, with the addition of two stainless steel grips
- ✓ Conforms to REACH Standards
- ✓ Tested for harmful substances in accordance with Oeko Tex Standard 100
- ✓ Displays due diligence in the prevention of foreign body contamination

Product and Packaging Information

Product Code	PED00HCHB	Dimensions	Adjustable to 53cm
Pack Size	100	Material	Polypropylene
Pack Weight	0.25kg	Detectability	Part Metal Detectable
Colour	Blue	Commodity Code	65050090

Materials

Manufactured from Polypropylene 56 Decitex (ISO 9001), featuring elastic made from nylon covered rubber and two 5mm Stainless Steel grips, it also conforms to REACH standards and tested for harmful substances in accordance with Oeko - Tex Standard 100. Dry fastness - 4/5 grey scale C06A2S.

These products are not designed to come in to direct contact with food and therefore do not come with any food contact approvals or certifications. They are to be used as personal protection to reduce the risk of hair contamination.

Safety Certificates / Approvals

REACH Compliant	BRC Compliant	Made In Britain
Oeko-Tex Standard	ISO 9001:2015	

Metal Detectability

The HairCare Detectable Hairnet contains two 5mm Stainless Steel grips, which can be detected by correctly calibrated metal detection systems. The detectability of this product will vary based upon the metal detection systems being used and their calibration. Detectability performance will vary based on, but not limited to the following factors:

- Calibration Levels
- Product Type (E.g. Wet, Dry, Frozen, Liquid)
- Aperture Dimensions
- Orientation

For this reason BST recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. It may be the case that your equipment needs to be re-calibrated in order to reliably detect this product. Such a professional should be available by contacting the manufacturer of your metal detection system.
