

## BST Detectable Beard Net | PE2\*\*6T\*

5mm Close Mesh Beard Net

3mm Extra Close Mesh Beard Net

### Product Description

Beards nets are an essential part of HACCP and ensure product safety. Manufactured from Polypropylene for excellent moisture transportation and wicking properties, ultimately keeping operatives cooler and more comfortable and less prone to touching and adjusting the headwear. The mesh traps the hair at the root and allows the wearer to breathe easily without condensation build up.

Our Beard nets are made from a warp knitted polypropylene yarn, feature two metal detectable closures and a lay flat double elastic to distribute pressure evenly to avoid skin indentation and discomfort. The excellent quality elastic will ensure long hair is secure, reducing the occurrence of protruding wisps. Available in close mesh (5mm), or extra close mesh (3mm).

### Detectable Beard Net Advantages

- ✓ Detectable by in-line metal detection systems
- ✓ Highly visible colour range for easy visual identifications
- ✓ Significantly reduces foreign body facial hair contamination
- ✓ Two integral metal detectable closures reduces the risk of the product becoming a foreign body contaminant
- ✓ Manufactured from polypropylene Oeko-Tex class 1 yarn
- ✓ Conforms to REACH Standards
- ✓ Displays due diligence in the prevention of foreign body contamination

## Product and Packaging Information

<b>5mm Close Mesh</b>	PE2876T*	<b>Colour(s)</b>	B,R,G,W
<b>3mm Extra Close Mesh</b>	PE2926TB	<b>Colour(s)</b>	Blue
<b>Pack Weight</b>	0.05kg	<b>Material</b>	Polypropylene
<b>Pack Size</b>	36 on a card	<b>Detectability</b>	Part Metal Detectable
<b>Dimensions</b>	Stretch To Fit	<b>Commodity Code</b>	65050090

## Materials

Manufactured from polypropylene Oeko-Tex, class 1 yarn which is ecologically harmless and friendly to skin, it also conforms to REACH standards.

These products are not designed to come in to direct contact with food and therefore do not come with any food contact approvals or certifications. They are to be used as personal protection to reduce the risk of hair contamination.

## Metal Detectability

---

These beard nets contain two 5mm metal closures which can be detected by correctly calibrated metal detection systems. The detectability of this product will vary based upon the metal detection systems being used and their calibration. Detectability performance will vary based on, but not limited to the following factors:

- Calibration Levels
- Product Type (E.g. Wet, Dry, Frozen, Liquid)
- Aperture Dimensions
- Orientation

For this reason BST recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. It may be the case that your equipment needs to be re-calibrated in order to reliably detect this product. Such a professional should be available by contacting the manufacturer of your metal detection system.

The information provided in this product specification sheet is based on our experience and knowledge to date and we believe it to be true and reliable. This information is intended as a guide for your use of our products, the use of which is entirely at your own discretion and risk.
