

Fish 600 Safety Knife | KN31F6**7MB

Fish 600 Safety Knife

The Fish 600 is a fully metal detectable, disposable safety knife. The large stainless steel blade is fully concealed for utmost operator safety, this blade is ideally suited for cutting packaging paper, shrink wrap and plastic strapping. The optional rear hook blade is also made from stainless steel and is designed for cutting through packaging tape, string netting and

cardboard. The body of the Fish 600 is made from food safe metal detectable polypropylene, available in four colours to match your organisations colour coding.

There is also an optional tape cutter model instead of the hook blade version. Replacement blades are available to order from BST.

Fish 600 Knife Advantages

- ✓ Detectable by in-line metal detection systems
- ✓ Bright visible colours available for easy visual identification
- ✓ Multi-functional knife ideal for strapping, banding, stretch wrap, card, tape, cable ties, rope, string and netting
- ✓ Concealed blades minimise the risk of injury and drawing blood
- ✓ Lightweight, economical single piece moulded knives
- ✓ Can be used for a variety of applications within hygiene critical processing environments
- ✓ Simple design minimises any potential 'germ traps' and features a lanyard point
- ✓ Can be used as part of HACCP and BRC procedures
- ✓ Displays due diligence in the prevention of foreign body contamination

Product and Packaging Information

Fish 600 With Hook	KN31F6007M*	Blade(s)	Straight & Hook Blades
Fish With Tape Cutter	KN31F6107M*	Blade(s)	Straight & Tape Cutter
Fish W/Out Hook	KN31F6307M*	Blade(s)	Straight Blade
Pack Size	10	Body Material	Polypropylene
Pack Weight	0.25kg	Detectability	Metal Detectable
Colour	B,R,G,Y	Commodity Code	82119200
Dimensions	165 x 40 x 6mm		

Safety Certificates / Approvals

BRC Compliant ISO 9001:2015 Made In Britain

Metal Detectability

The Fish 600 safety knives are moulded from an electromagnetically detectable plastic compound. The detectability of these materials will vary based upon the metal detection systems being used and their calibration. All components of this safety knife are manufactured from metal detectable polymers or stainless steel, making the product fully metal detectable. Detectability performance will vary based on, but not limited to the following factors:

- Calibration Levels
- Product Type (E.g. Wet, Dry, Frozen, Liquid)
- Aperture Dimensions
- Orientation

Orientation is a highly influential factor for the metal detectability of a contaminant that is non spherical, i.e. it will be easier to detect the contaminant when passing in one orientation compared to another - this is known as the orientation effect.

For this reason BST recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. It may be the case that your equipment needs to be re-calibrated in order to reliably detect this product. Such a professional should be available by contacting the manufacturer of your metal detection system.
