

Detectable Glove Guard | PE1GL1MB

Product Description

The Glove Guard features a patented safety breakaway that prevents the user from being pulled off balance if their gloves snag in a piece of equipment.

This handy clip uses a ball and socket device that is designed to break away at a higher point. Use of the Glove Guard has proven to drastically reduce hand injuries and glove replacement costs.

Metal Detectability

The POM material of these glove guards are intended to be detected by metal detection systems. The detectability of this product will vary based upon the metal detection systems being used and their calibration. Detectability performance will vary based on, but not limited to the following factors:

- Calibration Levels
- Product Type (E.g. Wet, Dry, Frozen, Liquid)
- Aperture Dimensions
- Orientation

For this reason BST recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. It may be the case that your equipment needs to be re-calibrated in order to reliably detect this product. Such a professional should be available by contacting the manufacturer of your metal detection system.
